

DC  
DC1  
SweepVar="IBB"  
Start=19.5  
Stop=25  
Step=0.5

The sweep variable and range are defined in the "DC" controller.

Units are defined as uA in the I\_DC source component.

The sweep parameters are displayed by editing the component and going to the "Display" page in the parameter dialog.

Var  
Eqn  
VAR  
VAR1  
IBB=0

The variable IBB is initialized here, but the value is set in the "DC" controller.
